## SKILLS

**Domain:** Mobile Developer (iOS development and Android development)

**Languages:** Swift, Java, C, C++, Python, CSS, HTML

**Technologies:** Firebase, Cocotouch

## PROJECTS

### BCSS Wildcats iOS App (Swift)

Dec. 2018 - Current

- **Singlehandedly designed and developed** a smart planner that manages the academic life of **over 450 students**.
- Enhanced productivity by creating features that managed schedules, gave access to realtime data on events, and more.
- Implemented **Firebase's Realtime Database** to allow staff to remotely update school information.
- **Collaborated and consulted** with teachers and students to deliver an extracurricular explorer feature that improved student engagement.

### Self-Operating Forest Fire Research Drone (Python)

Sept. 2019 - Dec. 2019

- Teamed up with classmates to engineer a drone that searches for forest fires and renders a heat map around the fire using image data.
- Implemented the heatmap visualizer that produces accurate visual outlines of forest fires by using **Matplotlib** and **Seaborn**.

### Joke Lab Android App (Java)

Dec. 2016 - Jan. 2017

- **Independently designed and built** a joke generator that displays emojis using **Core Animation** to create an experience for the user to enjoy or share.
- Installed by **over 100 users** while having a **4.9 rating** on the Google Play Store.
- Integrated non-intrusive **Admob** banner ads for monetization while maintaining minimal user interface.

## EXPERIENCES

### TEDxYouth@DeerLake, Director of Technology

Sept. 2018 - June 2019

Burnaby, BC

- Programmed a fully responsive website with **CSS, HTML**, and basic **JavaScript**.
- **Coordinated and cooperated** with team members to setup a successful event that **raised over \$750** in ticket sales.
- Assessed speaker applications and chose speakers that pushed our theme of Breaking Barriers.

### Science World, Robotics Volunteer

Sept. 2017 - May 2019

Vancouver, BC

- Facilitated the teaching of basic robotics and programming at an advanced robotics club (ages 8-11).
- Curated and prepared lessons that bettered the understanding of programming language Robot C, robotic sensors, and motors.

## EDUCATION

### University of Waterloo

Sept. 2019 - Current

B.SE. Candidate for Bachelor of Software Engineering 2024

GPA: 3.5
